

Trinity Valley Community College Guide for Potential Dual Credit Courses

Crosswalk Overview

This is a guide for cross-walking TVCC college credit courses with high school credit for dual credit. This crosswalk is derived from current practices within TVCC service-area independent School Districts, as well as other community colleges. Suggested crosswalks are not mandated. This document is not intended to dictate how local ISDs choose to award high school credit in a dual credit program (this authority is ultimately the responsibility of the ISD).

This crosswalk includes the suggested high school course, the TVCC course, the TSIA requirements, and any prerequisite information. All information is subject to change as state laws and college policies change.

Dual Credit

Courses taken by high school students through Trinity Valley Community College must be pre-approved by the appropriate high school official to receive dual credit. Documentation of this approval is presented during the registration period with a completed dual credit form.

College Transfer Concerns

Points to consider when advising students concerning the transfer of college credits from one college to another:

- 1. When planning to transfer credit, it is the responsibility of the student to check with the receiving institution to determine the transferability of a course before enrolling in the course.
- 2. There are times when a course will be counted as a transfer between institutions; however, that course may not apply to the required courses needed for completion of a particular major.
- 5. In addition to the TSIA requirements listed below, High School 9th and 10th graders are required to take and pass the TSIA2 Englich test prior to enrolling in any academic Dual Credit Courses.
